

Pyrus calleryana 'Cleveland Select'

Bay Road Nursery Screening Collection

Features:

Everybody loves the sweet smell of white *Murraya* flowers in spring and summer. The small glossy green leaves and fresh new growth all adds up to be one of the most versatile small hedging or screening plants. *Murraya* is often overlooked and should be considered for use in mass plantings in more gardens in the bayside area. It tolerates our sandy soils and windy conditions. It is also one of the best value, fast growing screening options.

Care:

Very little care is required to grow *Murraya*, however with regular summer watering and pruning an exceptional result can be achieved very easily.
